Defining Excellence Since 1939

Colors are representative. Actual colors may vary from this chart. Please see your Rock-Tred representative for samples.

All concrete should be tested for moisture and treated with Rock-Tred’s ROCK-BLOCK Moisture Vapor Barrier when indicated.
INDUSTRIAL

Creating long term flooring solutions for industry is our lineage!

POXI-ROCK TD

When heavy point loads, scraping, impact and vibration are at work there is no better epoxy Overlay than our Post-Rock Flooring! This epoxy mortar was created with a proprietary aggregate that makes it possible to maintain a high resin to rock ratio while making it easy to trowel apply. This system can be hand or power trowel applied with ease and can be returned to active service within 6 hours of being installed (when temps are 72°F of higher).

CHEM-ROCK BC

When you need an industrial strength floor in a hurry, you can rely on our 1/8", resin-rich, 100% solids epoxy self-leveling system. This system is cost effective, self-priming over most concrete and easy to install over large square footage in short amounts of time. When the concrete is porous a primer is recommended to control out-gassing. An optional finish coat can be installed to meet additional performance requirements such as higher chemical and abrasion resistance, increased coefficient of friction and better UV resistance. This system is recommended to be only installed my contractors who have completed the Rock-Tred Institute 1, 2, & 3.

NOVO-POXI CR

Novo-Poxi CR is a 100% solids high density polymer broadcast system that can be installed at 1/16"-3/16". It is designed for areas that will be exposed to elevated temperatures as well as areas of chemical resistance testing contact the Rock-Tred technical service department.

ROCK-TRED SL

When needed an industrial strength floor in a hurry, you can rely on our 1/8", resin-rich, 100% solids epoxy self-leveling system. This system is cost effective, self-priming over most concrete and easy to install over large square footage in short amounts of time. When the concrete is porous a primer is recommended to control out-gassing. An optional finish coat can be installed to meet additional performance requirements such as higher chemical and abrasion resistance, increased coefficient of friction and better UV resistance. This system is recommended to be only installed my contractors who have completed the Rock-Tred Institute 1, 2, & 3.

Creating beautiful floors that last over time is our hallmark.

**ONE DAY INSTALL**

**FAST-FLOOR EP**
- Chem-Thane PS/PDP070 clear or tinted
- Selected aggregate or flake broadcast material
- Rock-Crete Dressing tinted
- Concrete

**FAST-FLOOR WBEP**
- Clear or tinted
- Salted aggregate or flake broadcast material
- Rock-Crete Dressing tinted
- Concrete

**FAST-FLOOR UP**
- Chem-Thane PS/PDP070 clear or tinted
- Deferred aggregate or flake broadcast material
- Rock-Crete Dressing tinted
- Concrete

**FAST-FLOOR FLEX**
- Clear or tinted
- Rock-Prime DP tinted
- Rock-Prime DP in clear

**FAST-FLOOR HT**
- Clear or tinted
- Rock-Prime HB tinted and blended with HT-Part C high wear filler
- Rock-Prime HB or Rock-Prime HB-45 tinted

**WALL AND CEILING**

**WC E2**
- Non-porous substrate
- Clear Rock-Prime EP
- Clear-Wall Black Filler tinted
- Rock-Prime Sealer tinted
- 1K or 2K

**WC MAT LAY UP**
- Non-porous substrate
- Rock-Prime DP tinted
- Rock-Wall Sealer tinted
- Selected aggregate or flake broadcast material
-Concrete

**WC GRAFFITI RELEASE**
- Non-porous substrate
- Two coats of Rock-Prime HB tinted
- Top coat of Chem-Thane WB Glass or Matte clear or tinted

**WC EP**
- Non-porous substrate
- Rock-Prime DP tinted
- Rock-Wall Sealer tinted
- Selected aggregate or flake broadcast material
- Clear finish coat of PS/PDP070

For almost every floor there are four walls and a ceiling that need protection. At Rock-Tred, unlike most flooring manufacturers, Wall and Ceiling coating solutions are not an afterthought! Rock-Tred has been manufacturing Wall and Ceiling coatings solutions for decades. We apply the same rigorous testing to those systems as we do to our renowned flooring materials and we make them easy to use!

*Available Colors: 1

When safety, beauty and fast return to service are critical our Fast-Floor Flex is the perfect solution. It is the perfect finish for low to medium traffic areas, weight rooms, retail environments and any place where aesthetics, more ergonomically friendly finishes is desired.

**FAST-FLOOR UP**
- When safety, beauty and fast return to service is critical our Fast-Floor Flex is the perfect solution it is the perfect finish for low to medium traffic areas, weight rooms, retail environments and any place where aesthetics, more ergonomically friendly finishes is desired.

**FAST-FLOOR HT**
- When you need an industrial strength floor in a short period of time look no further than our HT System. This system combines a tinted high build basecoat and our tinted waterborne urethane with a proprietary high wear filler to create an extremely abrasion resistant finish. It is VOC compliant, UV stable and can be completed with very little down time such as in a matter of one or two days.

**FAST-FLOOR WBEP**
- This one day flooring system is designed with the garage floor market in mind. Rock-Prime HB provides a dry film thickness comparable to only 100% solids epoxy formulations. By broadcasting or rejection, capillaries are created during the curing process that act as pressure release points for moisture vapor. This feature helps to reduce moisture related叫 backs.

**FAST-FLOOR FLEX**
- This system combines our fast set epoxy resins, decorative elements and our high wear filler to create our most abrasion resistant finish. It is VOC compliant, UV stable and can be completed in one day. Not only can you finish the floor in a single day, but you do so with confidence knowing that our polyaspartic lineup is unmatched in abrasion, gloss and UV resistance!

**FAST-FLOOR EP**
- This 1/16" system combines our fast set epoxy resins, decorative elements and our high wear filler to create our most abrasion resistant finish. It is VOC compliant, UV stable and can be completed in one day. Not only can you finish the floor in a single day, but you do so with confidence knowing that our polyaspartic lineup is unmatched in abrasion, gloss and UV resistance!

**WC MAT LAY UP**
- For critical environments such as research labs, clean rooms and containment areas Rock-Tred offers our epoxy fiberglass lining system. This system provides a pinhole free and easy to sanitize surface that requires little or no maintenance. It resists harsh cleaners, acids, caustics, mild thermal shock and is completely renewable!

**WC GRAFFITI RELEASE**
- Rock-Tred’s Graffiti Release was created for environments like schools, public transportation, correctional facilities and hospitals. This system’s stain resistant top coat helps eliminate unwanted marking of facility walls and ceilings and makes them easier to keep clean. This system is low VOC and low odor allowing it to be installed in occupied spaces where odors and VOCs may be a concern. This available in select standard colors. Speak to your ROCK-TRED representative for more details.

**WC EP**
- This system combines industrial strength without sacrificing an aesthetic appeal. It is the perfect system for factory lunchrooms, employee meeting areas, retail hallways and any place requiring long term performance. WC EP provides excellent, cost-effective protection over drywall, CMU and a variety of other substrates.
Rock-Tred designed our cold temperature flooring solutions because sometimes you have no choice but to work in the cold. From freezer floors and coolers to unheated job sites, Rock-Tred has a solution to meet your needs. Rock-Tred’s Cold Temp Solutions meet the guidelines for installation in USDA/FDA inspected facilities.

**COLD TEMP SOLUTIONS**

**COLD TEMP E45**
- Concrete
- Chem-Rock LT 45 tinted
- Layer of Rock-Crete aggregate
- Optional Rock-Crete Dressing tinted
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**COLD TEMP E25**
- Concrete
- Chem-Rock LT 25 tinted
- Layer of Rock-Crete aggregate
- Optional Rock-Crete Dressing tinted
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**COLD TEMP UTD**
- Concrete
- Poxi-Rock Primer clear
- Elasti-Thane Membrane
- Elasti-Thane Topcoat 1K or 2K

**COLD TEMP USL**
- Concrete
- Rock-Prime DP
- Elasti-Thane Membrane WB
- Broadcast of Rubber Blends

**COLD TEMP ARCTIC**
- Concrete
- Rock-Prime DP
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR SOLUTIONS**

**SOFT FLOOR DECK & BALCONY**
- Concrete
- Poxi-Rock Primer clear
- Elasti-Thane Membrane
- Elasti-Thane Topcoat 1K or 2K

**SOFT FLOOR SPORTSMAT**
- Concrete
- Rock-Prime DP
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR POOL SAFE**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Sportmat Pore Filler
- Sportmat Adhesive

Life is hard, but your floor doesn’t have to be! Introducing our entire line of Soft Floors!

**SOFT FLOOR HUSH**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR DECK & BALCONY**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR SPORTSMAT**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR POOL SAFE**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

While we don’t encourage kids to run around the pool deck, we know they will walk fast-very fast! Our Soft Floor Pool Safe system provides a softer, safer non-skid surface. It also resists the chemicals typically used in pool and spa water, ultra violet light, and minor substrate movement.

**SOFT FLOOR HUSH**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR DECK & BALCONY**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR SPORTSMAT**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear

**SOFT FLOOR POOL SAFE**
- Concrete
- Elasti-Thane Topcoat 1K or 2K
- Elasti-Thane Basecoat Slurry
- Post-Rock Primer clear
